

## Storm Water Workshop for Homeowners

Join the program and use best management practices for your yard and garden. Homeowners can be everyday clean water heroes and better environmental stewards who make water quality enhancing choices regarding fertilization, pesticide application, mulching, composting, native plants, geosynthetics and sediment control, channel guard for rain gutters, grasspave/ gravelpave for porous paving, healthy yard care, and integrated pest management.

# Healthy Yards, Clean Streams Workshop For Homeowners

A 4 hour workshop sponsored by the City's Environmental Services and Hui Ku Maoli Ola, in partnership with University of Hawaii College of Tropical Agriculture and Human Resources (CTAHR) Cooperative Extension Service, GeoTech Solutions, and Exacta Sales.

### Purpose

Learn how to reduce chemical and nutrient runoff by practicing responsible yard and garden care.

**Date: January 15, 2011**

**Time: 8am-Noon**

**Location: Hui Ku Maoli Ola, Haiku Road, Kaneohe**

**See map on back of flyer**

The deadline for registering for the workshop is January 11, 2011.

Please register on-line at [www.cleanwaterhonolulu.com](http://www.cleanwaterhonolulu.com), click on contact us. All participants will receive a free native plant and are eligible to enter a random drawing for a mulch mower.

The EPA considers storm water runoff from yards, streets, parking lots and other urban areas to be one of the most significant sources of contamination of our local waters. All storm water flows directly from gutters and storm drains straight to streams and the ocean, untreated.
